

Bullfinch

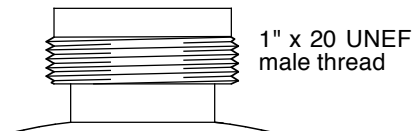

PERFORMER propane Gas Torch Kit No. 164

Instructions

**Important:- Retain these instructions.
Read them before using the
equipment.**

- Ensure that the rubber sealing washer is in position and that it is undamaged before fitting the Head Connector to the gas cylinder.
- Use only in a well ventilated area.
- Operate away from flammable materials.
- Secure burner to the Head Connector with 11 mm spanner, do not use excessive force.
- Screw Head Connector to gas cylinder hand tight.
- Check for leaks with a leak detecting fluid or a suitable soap solution. Rectify all leaks before using.
- To light. Open valve and apply ignition flame to burner.
- To turn off. Close valve (clockwise).
- Remove Head Connector from cylinder for storage.

- **Warning:-** Burner gets hot when in use.
- Use only disposable propane or MAPP® gas cylinders with a CGA 600 connection (see diagram).

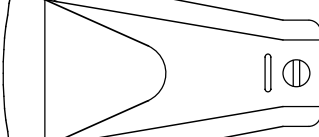

- Never attempt to modify the equipment.
- For service replacements use only approved Bullfinch spare parts.
